

COMP Cams® Black-Wrinkle Powder Coated Valve Covers

COMP Cams® announces release of new die cast valve covers for SBC, BBC and SBF engines, finished in a Black-Wrinkle powder coat with a polished laser etched logo

This new line of premium die cast aluminum valve covers completely reinvents the way valve covers are designed. The sleek and durable Black-Wrinkle powder coat finish with a polished laser etched logo is sure to provide that performance look you desire. The line currently includes applications for Small Block Chevy, Big Block Chevy and Small Block Ford engines.

These valve covers are perimeter bolt style and include two chrome breathers with laser etched logos, two black rubber grommets and installed baffles. The installed baffles are welded in place to ensure no oil enters the breathers. The chrome breathers are present on both valve covers which allows for proper crankcase ventilation. In addition, these covers were designed to be tall enough to provide the necessary clearance to accommodate aftermarket valve trains.

Manufactured and packaged in the U.S.A., this new line of powder coated die cast aluminum valve covers will offer you a sleek, high-performance look combined with rigid durability and unmatched reliability. They are a perfect addition to any high-performance engine. Gaskets are not included. For more information about the COMP Cams® Valve Covers or any other COMP Cams® product, call us at 1-800-999-0853, or visit us online at www.compcams.com.

Quick Summary

Product: COMP Cams® Valve Covers

Part Number: #280 (SBC); #281 (BBC); #282 (SBF)

Features & Benefits:

- Die cast aluminum valve covers with Black-Wrinkle powder coated finish provide sleek look and enhanced durability
- Include chrome breathers with laser etched logos, rubber grommets & installed baffles
- Welded-in baffles prevent oil from entering breathers
- Taller height provides clearance for aftermarket valve trains
