

### Inglese™ SBC Valve Cover Adapter Kit For GM LS Engines

**New billet aluminum kit enables mounting conventional Small Block Chevy valve covers on late model LS-based GM Gen III & Gen IV engines**

In increasing numbers, hot rodders are making the switch to the reliability, performance and drivability provided by GM Gen III/IV engine packages. However, the valve cover choices for these LS engines leave much to be desired in the style department. Now thanks to the hot rodders at Inglese™ there is a simple way to add classic, show-inspired looks to your new LS engine. The all-new Small Block Chevy Valve Cover Adapter Kit from Inglese™ enables the use of traditional SBC valve covers on your new Gen III/IV LS engine.

Specifically, the billet aluminum adapters are designed to mate center bolt GM LS heads with any perimeter bolt Small Block Chevy valve covers. Give your late model engine the classy look of a traditional SBC, and further the retro look of transplanted LS engines in your muscle car or street rod. CNC-machined from billet aluminum, this kit features an o-ring channel for reuse of the stock LS valve cover seals, as well as featuring the same oil-deflecting lip on the spacer.

The kit is fully compatible with all GM LS valve train components, including large aftermarket shaft rockers and springs. Kit includes all necessary hardware. For more information about the Inglese™ Small Block Chevy Valve Cover Adapter Kit for GM LS Engines or any other Inglese™ product, call us at 1-866-450-8089, or visit us online at [www.inglese.com](http://www.inglese.com).
